Reporting period is from April 2003 to March 2019. Data for 2017 and 2018 may be incomplete due to the 2-year algorithm to identify asthma, and numbers are subject to change.

Note: Wait time is rounded to minutes. §Community hospitals encompass those hospitals not defined as small or teaching.

¹Time from triage to physician assessment ¶Paediatric hospitals are those for patients ≤ 18 years of age.

²Time from physician assessment to disposition **Small hospitals are single community providers with < 2,700 inpatient acute, CCC and day surgery weighted cases.

³Time from triage to disposition ††Teaching hospitals have membership in the Council of Academic Hospitals of Ontario (CAHO).

†Ontario Marginalization Index expressed in quintiles used as a proxy measure of socioeconomic status.

‡Rural communities defined as those with fewer than 10,000 people.

Note: One ED visit with hospital type in Mental Health was excluded by hospital type.

Asthma incidence and prevalence with missing LHIN, rurality, or PHU were excluded from the report.

Asthma ED were captured from the main problem diagnosis code in NACRS.

Source: This table uses statistics reported by the Ontario Asthma Surveillance Information System (OASIS) and data provided by ICES, Ontario.
