

Item 2.10: Included studies

Give the total number of included OMIs and study reports.

Title	2.1	Title
Open Science	2.2	Funding
	2.3	Registration
Background	2.4	Objectives
Methods	2.5	Eligibility criteria
	2.6	Information sources
	2.7	Risk of bias
	2.8	Measurement properties
	2.9	Synthesis methods
Results	2.10	Included studies
	2.11	Synthesis of results
Discussion	2.12	Limitations of evidence
	2.13	Interpretation

Tips for reporting this item:

- Report the total number of OMIs included in the review.
- Report the total number of study reports included in the review.

Examples:

“Out of 6423 screened publications, 32 original articles were eligible for inclusion in this review, reporting evidence on the measurement properties of 22 self-and/or proxy-reported questionnaires (including seven cultural adaptations) for various pediatric orthopedic conditions, including cerebral palsy (CP) and obstetric brachial plexus palsy (OBPP).”

Kalle J et al. Quality of patient-and proxy-reported outcomes for children with impairment of the upper extremity: a systematic review using the COSMIN methodology. *Journal of Patient-Reported Outcomes*, 2022;6(1):1-17. <https://doi.org/10.1186/s41687-022-00469-4>.

“In total 21 articles were included, describing 12 versions of 7 unique diabetes-specific PROMs or subscales measuring physical functioning.”

Elsman EBM et al. Systematic review on the measurement properties of diabetes-specific patient-reported outcome measures (PROMs) for measuring physical functioning in people with type 2 diabetes. *BMJ Open Diabetes Res. Care*, 2022;10(3):e002729. <https://doi.org/10.1136/bmjdr-2021-002729>.

“We included 24 articles describing the development and/or evaluation of 21 instruments.”

Uijen AA et al. Measurement properties of questionnaires measuring continuity of care: a systematic review. *PloS One*, 2012;7(7):e42256. <https://doi.org/10.1371/journal.pone.0042256>.
