

Keira Mattook, BSc
Summer Student

Joined the team in 2021
BSc: McMaster University

Keira Mattook joined the Schachar + Crosbie Lab in May 2021 as a Summer Research Student. Throughout her undergraduate experience at McMaster University, she has become more and more interested in the field of research, mental health and cognitive neuroscience. As a fourth year Kinesiology student, Keira has been able to apply her learning as a Student Clinical Therapist which has allowed her to gain a more in-depth understanding of: the nervous system, cognition and exercise. She is honoured to have the opportunity to explore these passions further as a Summer Research Student in the Schachar Crosbie Lab. She is excited to work alongside an esteemed group of individuals and hopes to learn more about the intricacies of neurodevelopmental disorders and mental health in a pediatric population.
